Below is the extracted text content from the captured web page. This section contains only the visible text, excluding scripts, styles, and hidden elements. It provides a human-readable snapshot of the page at the time of capture.

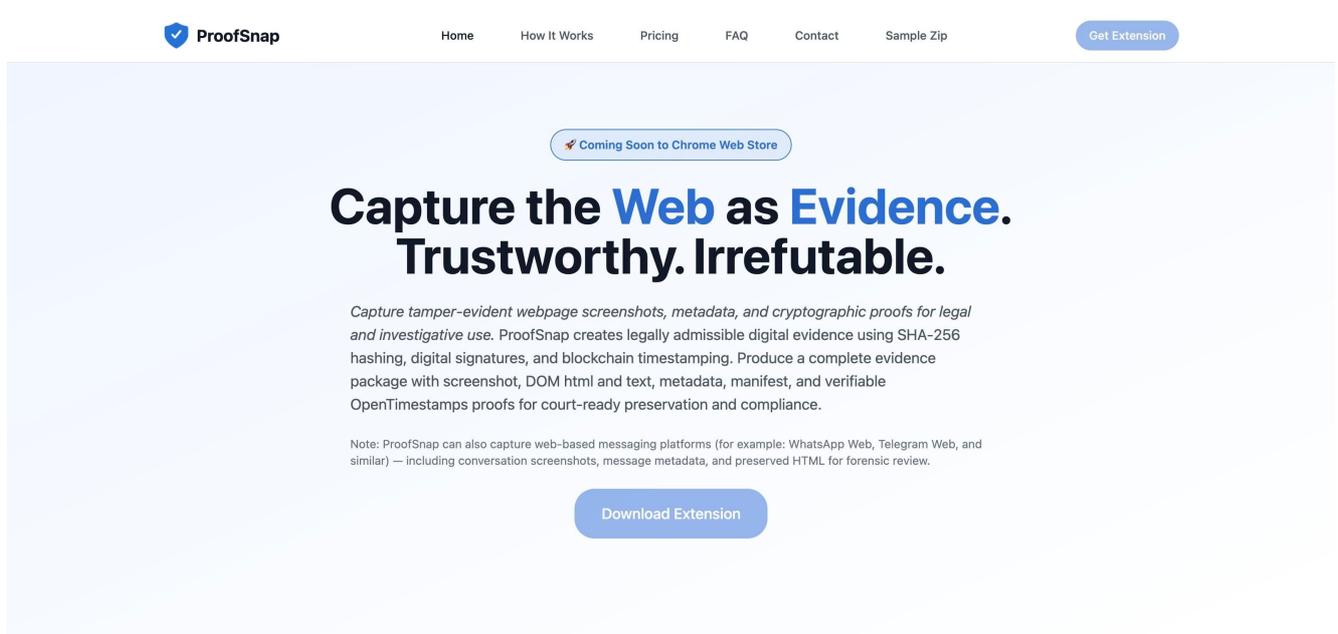

ProofSnap Home How It Works Pricing FAQ Contact Sample Zip Get Extension Coming Soon to Chrome Web Store Capture the Web as Evidence . Trustworthy. Irrefutable. Capture tamper-evident webpage screenshots, metadata, and cryptographic proofs for legal and investigative use. ProofSnap creates legally admissible digital evidence using SHA-256 hashing, digital signatures, and blockchain timestamping. Produce a complete evidence package with screenshot, DOM html and text, metadata, manifest, and verifiable OpenTimestamps proofs for court-ready preservation and compliance. Note: ProofSnap can also capture web-based messaging platforms (for example: WhatsApp Web, Telegram Web, and similar) including conversation screenshots, message metadata, and preserved HTML for forensic review. Download Extension What ProofSnap Captures Full page screenshot Complete visual capture of the entire webpage Metadata Timestamp, URL, user agent, and technical details Hash & digital signature Cryptographic proof of authenticity Export options Download as ZIP with all evidence files Who Uses ProofSnap and Why Lawyers & Compliance Document evidence for legal proceedings and regulatory compliance Timestamped snapshots for dispute resolution Audit-ready exports for regulatory filings Cryptographic hash for integrity Contract, Employment disputes "Screenshots aren't enough in court. ProofSnap gives us the structure, timestamp, and traceability we need." Journalists & Digital Investigators Preserve online evidence for investigative reporting Capture controversial posts or deleted pages Export as PDF or ZIP for transparency Embed source URL, timestamp, browser context Digital forensics, website changes, online harassment "ProofSnap lets us document the truth before it's edited, censored, or erased." Freelancers & Developers Archive web content for academic and technical research Save snapshots of staging or live releases Include DOM for frontend debugging Share ZIPs with clients or QA Timestamped proof for verification Web archiving, version control, data collection "It's like Git for the browser I can prove exactly what the site looked like when I shipped it." HR Managers, Recruiters, Visa Officers, Talent Ops Personal and professional documentation needs Timestamped proof for employment validation and visa processing Archive candidate documents for compliance and audit Save snapshots of onboarding portals and signed contracts Share ZIP bundles with legal,

visa, or payroll teams HR archiving, onboarding version control, and data integrity "It gives us a timestamped snapshot of the entire onboarding flow perfect for audits, visa processing, or internal reviews." Anyone Who Needs Trusted Snapshots Personal and professional documentation needs Save pricing pages, policies, receipts Archive agreements or service terms Use for personal records or disputes Exportable, portable, legally meaningful "I don't just save what I see I save what it means." How ProofSnap Works 1 Navigate to Target Webpage Open any web page you want to capture as evidence 2 Open ProofSnap Extension Open the ProofSnap extension to begin the capture process and then click " Capture page snapshot ". 3 Download Evidence Package Download a comprehensive ZIP archive containing all evidence files, cryptographic proofs, and blockchain timestamps by clicking " Download zip " or download individual files using the download icon in the Action column. Store securely on your device or in the cloud. 4 Verify with Trust Verifier Upload your evidence package ZIP archive by clicking the upload field and then click " Verify zip file " to independently confirm cryptographic integrity, validate digital signatures, and verify blockchain timestamps Flexible Plans for Every Stage Choose your plan and activate it directly in the app . What ProofSnap Captures

Scott Johnson
User

"I don't just save what I see — I save what it means."

How ProofSnap Works

1

Navigate to Target Webpage

Open any web page you want to capture as evidence

2

Open ProofSnap Extension

Open the ProofSnap extension to begin the capture process and then click "Capture page snapshot".

3

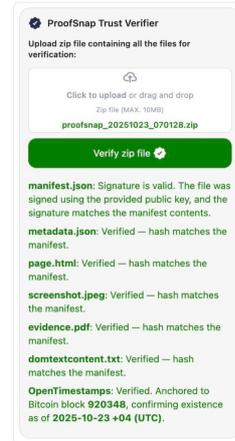

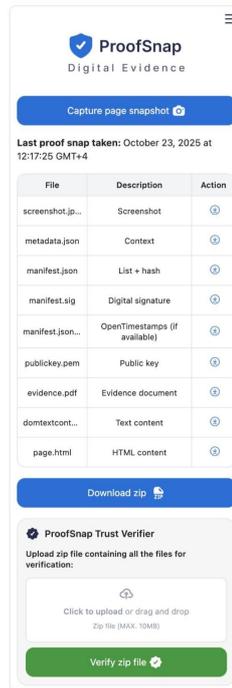

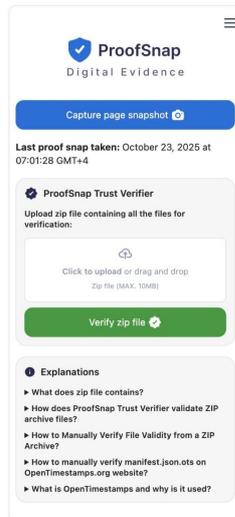

Download Evidence Package

Download a comprehensive ZIP archive containing all evidence files, cryptographic proofs, and blockchain timestamps by clicking "Download zip" — or download individual files using the download icon in the Action column. Store securely on your device or in the cloud.

4

Verify with Trust Verifier

Upload your evidence package ZIP archive by clicking the upload field and then click "Verify zip file" to independently confirm cryptographic integrity, validate digital signatures, and verify blockchain timestamps

Flexible Plans for Every Stage
