F**king gold!
Now we need one with Tim Walz, Nancy Pelosi, and Chuck Schumer.

screenshot.jpeg file included in your evidence package.

I. Formal Declaration of Integrity

The user identified by the ProofSnap system as `rmotycka@getproofsnap.com` hereby solemnly declares and confirms that the digital evidence attached to this statement in PDF/ZIP format was obtained on his behalf and at his instruction through the certified ProofSnap tool on Fri, 08 May 2026 16:56:33 GMT.

I confirm that this document (and its attachments) contains a complete and unmodified record of the web page as captured at the specified time and under the given technical conditions. The integrity and authenticity of this data is guaranteed by a digital signature, OpenTimestamps blockchain timestamp, and an EU eIDAS qualified timestamp (`manifest.json.tsr`) issued by a Qualified Trust Service Provider under EU Regulation No. 910/2014. This qualified timestamp carries the legal presumption of accuracy of the date and time it indicates, per Article 41 of the Regulation.

II. Data Collection Methodology Specification

The data collection methodology is fully described in the attached technical metadata and manifest, which are an integral part of the evidence package. Key collection parameters are as follows:

Target Source (URL): `https://www.youtube.com/watch?v=bWvrHQ0luul`

Collection Date and Time (UTC): Fri, 08 May 2026 16:56:33 GMT

(This timestamp is fixed and verified by blockchain.)

Collection Environment (User Agent): Mozilla/5.0 (Macintosh; Intel Mac OS X 10_15_7) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/147.0.0.0 Safari/537.36

User Identification: Collection was performed by user with email address `rmotycka@getproofsnap.com` from IP address 185.250.215.219.

Data Integrity: Data integrity is ensured by a unique SHA-256 hash of the entire package, which is subsequently time-verified in the OpenTimestamps network, thereby excluding the possibility of retroactive manipulation.

Legal Notice:

This document is generated by ProofSnap to provide a verifiable snapshot of a web page at a specific point in time. The included digital signatures and timestamps ensure the integrity and authenticity of the captured data. This evidence may be used for legal or compliance purposes, subject to applicable laws and regulations.
